

THE CENTRE FOR HIV/AIDS PREVENTION STUDIES

YOUR HEALTH, OUR MISSION

CHAPS ESWATINI

The Centre for HIV/AIDS Prevention Studies (CHAPS), Eswatini is a local NGO registered in Eswatini, with **100% Eswatini management and leadership**. Since the inception of the programme, CHAPS has served as a reliable, hands-on partner in assisting the Ministry of Health's (MOH) Swaziland National AIDS Program (SNAP) to achieve the goals set in the Swaziland National Strategic Framework (NSF). CHAPS supports the VMMC program with demand creation, direct service delivery, trainings and technical assistance to the MOH.

Alfred K. Adams, born in the Kingdom of Eswatini, is a Medical Social Scientist with more than 10 years' experience in implementing public health interventions and conducting research. His work has largely focused on research, large scale impact evaluation, implementation science, programme implementation and programme management in Eswatini.

Ndumiso M. Dlamini is a local data scientist working on improving data systems within the voluntary medical male circumcision program in the Kingdom of Eswatini. His dedication and passion towards data management has assisted him to train and capacitate many young data oriented professionals to sharpen their skills and improve knowledge gaps in data analysis and Geographic Information System skills. He looks forward to working intensely with the Kingdom of Eswatini's Ministry of Health and its stakeholders to assist the nation to eliminate the HIV pandemic with the power of data.

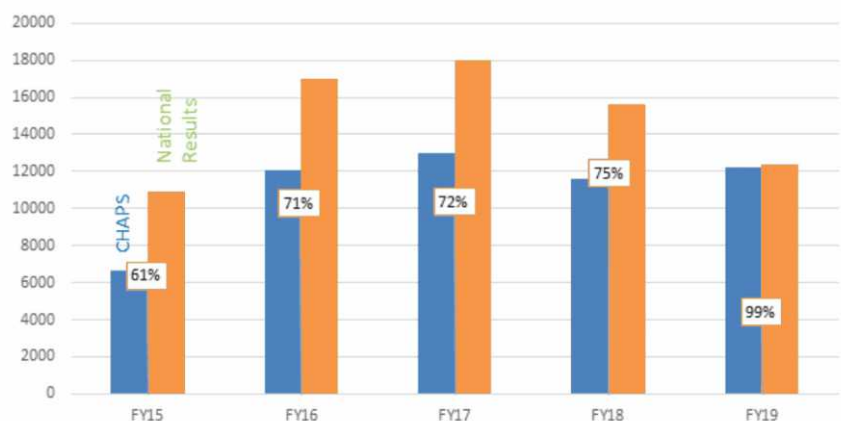

CHAPS provides HIV testing services, TB screening and testing, STI screening and testing and referral to treatment. CHAPS contributes to increased knowledge and awareness of VMMC and benefits as well as the increased uptake and social normalization of health services by men in Eswatini. Women are now participating in men's health issues and by advocating for men's health encouraging their partners and sons to uptake health services.

During this project period CHAPS, with the support from USAID, has successfully:

- **Delivered a total of 55 613 VMMCs between 2015 and 2019 in Eswatini, supported by USAID**
- **This accounts for 76% of the total number of VMMCs performed nationally in the Kingdom**
- **Trained over 200 practitioners and staff on VMMC**
- **Contributed to an estimated aversion of 26 626 HIV infections**
- **Supported comprehensive prevention through provision of HTS, TB and STI screening and referrals**
- **Contributed towards local economic improvement through capacity building of staff and NGOs, employment of local communities and CBOs**

CHAPS percentage contribution to National VMMC Done FY15-FY19

CHAPS runs the biggest and most productive VMMC facility in the country, Soka City.

This work was supported by USAID through the Cooperative agreement number: AID-674-A-15-00001

**612 EARLY INFANT
MALE CIRCUMCISIONS**

12 228 SUCCESSFUL VMMCs

CHAPS Blitz Campaigns with VMMC Celebrity Champions, Smallz, Gedlembane and Slwane. The Blitz campaigns through CHAPS VMMC Champions managed to attract hundreds and many were registered and linked to VMMC services.
